More Living Space
Modern roofing technology with PLEXIGLAS®
for new buildings and renovation projects
Product Finder

We know everything there is to know about PLEXIGLAS® - after all, we did invent it!

Use this brochure to select the suitable grade of PLEXIGLAS® for your application. The Anti Algae Application (AAA), heat protection, maximum stability, crystal clarity or special hail resistance of these grades offer you additional comfort and safety.

Patio Roofs and Conservatories
Sit outside even when it rains. Pick citrus fruits and fresh herbs all year round. Increase your living space yet cut your heating costs.
Less cleaning effort thanks to AAA
One of the main reasons for dirty roofs is the growth of algae, moss etc. But many roofs are hard to clean because they are difficult to reach. Our new generation of PLEXIGLAS® RESIST® SDP 16 multi-skin sheets has therefore been equipped with an Anti Algae Application (PLEXIGLAS® RESIST® AAA) based on nanotechnology. This coating makes use of the sun’s natural UV radiation to prevent algae, mosses, pollen and other soiling agents from adhering to the sheet or causes them to dissolve completely. Any residues are almost completely washed off by the next rainfall.

Lightweight and stable
Roofs made of PLEXIGLAS® are easier to access than heavy glass and let in more light. The reason is simple: the supporting structure can be much more delicate, while providing the same level of stability. That saves time and money during installation.

Seven meters all in one piece
PLEXIGLAS® helps to create spacious living areas. All multi-skin and corrugated sheets are available in lengths up to seven meters and more.

Quiet in the rain
PLEXIGLAS® is quiet! The thickness of the multi-skin and corrugated sheets provides good sound insulation and significantly reduces rain noise.
Carports and Canopies

No need to scratch away ice in the winter, no dents due to hailstones, no water in the cellar. Open your door without getting wet.
Durability through incorporated UV protection
As covers on building structures, roofs are exposed to all winds and weathers, so durability and longevity are important purchasing criteria. PLEXIGLAS® multi-skin and corrugated sheets offer decades of protection from the results of UV radiation, yellowing and light loss because they consist of naturally UV-stable molecules through and through. This means the entire sheet is protected, not just the surface.

Safety and protection against UV radiation
No more risk of getting sunburned – selected PLEXIGLAS® multi-skin and corrugated sheets hold off UV radiation. This is confirmed by the Hohensteiner Institute in line with the stringent requirements of Australian standard AS/NZS 4399:1996.

PLEXIGLAS®, whether as a multi-skin, corrugated or solid sheet, offers the highest ultraviolet protection factor (UPF) of any roofing material, UPF 50+. By way of comparison, the UV protection of a PLEXIGLAS® roof is similar to that of a roof made of wood or tiles.

Many colors and surfaces
PLEXIGLAS® multi-skin and corrugated sheets are available in three surface variants and six colors. As well as the clear-transparent variety, classical White and Brown, the sheets are also offered in the trend colors “Cool Blue,” “Grey” and “Opal.”
Home and Garden

Let in light but protect your privacy. Enjoy simple machining and installation with conventional tools.
Easy to machine
PLEXIGLAS® is just as easy to machine as wood. Partitions, balcony guards or door infill panels can be made to suit individual wishes.

30-year guarantee against yellowing
With PLEXIGLAS® you are always on the safe side. We give a 30-year guarantee that clear-transparent PLEXIGLAS® will not yellow and will retain its high light transmission.

Lightweight but strong
Even the heaviest sheet from our range of roofing materials weighs less than six kilograms per square meter. That saves energy during installation and reduces the number of helpers required.

No dripping
With a PLEXIGLAS® roof, you can even look forward to the rain, because many multi-skin sheets are provided with a NO DROP coating. Water flows off in an invisible film and there are no unsightly drops.

PLEXIGLAS® can take rough treatment
Owing to their increased impact strength, PLEXIGLAS® multi-skin and corrugated sheets can withstand rough treatment during installation and machining. Even hailstones cannot harm them.
PLEXIGLAS RESIST® has nothing to fear from hail, ice and snow. The sheets are so tough that a heavy steel ball dropped on them from a height of one meter simply bounces off.

**World novelty: Anti Algae Application**

The Anti Algae Application produced for the first time for plastics roofing is the answer to dirty roofs that take a lot of effort to clean. Unsightly greenish-brown algae deposits are decomposed by an ecologically harmless reaction process on the sheet surface and washed off by the rain.

**Energy savings**

The 32mm thick multi-skin sheet from this range has a U-value of 1.6 W/m²K. That means it meets the stringent requirements of the German Energy Conservation Regulation (EnEV) and keeps conservatories cozily warm even at sub-zero temperatures.

**Possible applications**

- Conservatories
- Patio roofs
- Canopies
- Carports
- Professional greenhouses
- Interiors

PLEXIGLAS HEATSTOP®
For Pleasant Temperatures
Keeping the Heat Outside

A PLEXIGLAS HEATSTOP® roof reduces heat buildup by as much as 75% compared with conventional clear-transparent double glazing. Cars under the carport stay much cooler and the air below patio roofs is still pleasantly mild even in hot sunshine.

Choice of two variants
PLEXIGLAS HEATSTOP® multi-skin and corrugated sheets are available in grades Cool Blue and Opal. They offer ideal light diffusion and provide uniform brightness.

Insulating experts
Our 32mm multi-skin sheets offer high heat insulation and are therefore the materials of choice for conservatory manufacturers.

Variety of colors
The HEATSTOP coating gives the sheets an attractive surface sheen. Depending on the viewing angle, the sheets have a pleasant blue or iridescent appearance. This play of colors enables interesting lighting and design effects.

The Professional for Commercial Greenhouses

What is vital to commercial gardeners is every bit as important for private plant lovers. PLEXIGLAS ALLTOP® multi-skin sheets transmit the entire spectrum of UV radiation. That provides colorful plants with vigorous growth. Like all transparent sheets, this comes with a 30-year guarantee.

Clear view and loadbearing capacities
PLEXIGLAS ALLTOP® shows unparalleled light transmission. Its thickness makes it very stable, torsion-resistant and capable of withstanding snow loads.

No water marks
All surfaces of this multi-skin sheet (inside and out) are equipped with the NO DROP coating. Rain and condensation flow off as an invisible film and leave no marks after drying.

Clear view from both sides
With its wide web spacing of 64mm, PLEXIGLAS ALLTOP® offers excellent clarity, almost like glass.

**Order information**

1) PLEXIGLAS ALLTOP® SDP 16 Clear 29080
As everyone knows, you don’t need a specialist for everything. The same applies to PLEXIGLAS® BASIC multi-skin and corrugated sheets. Their delicate configuration saves material and makes them ideal for small roofs, for instance, that do not have to meet such stringent requirements in terms of snow and wind loads.

Same good genes as the specialists
PLEXIGLAS® BASIC sheets share many of the good properties of the special PLEXIGLAS® grades. These inexpensive sheets are also made up of the same naturally UV-stable molecules as the other sheets in the range. The entire sheet is therefore protected from yellowing and weathering, not just the surface. PLEXIGLAS® BASIC is of medium thickness and reduces rain noise. It is stable, torsion-resistant and capable of withstanding snow loads.

Transparent and tough
All PLEXIGLAS® BASIC sheets are impact-resistant and can take a knock or two. Their light transmission is only slightly below that of the professional-grade sheets.

Possible applications
- Conservatories
- Patio roofs
- Porches
- Carports
- Professional greenhouses
- Canopies
- Interiors
